WHO I AM

My childhood dream was to be the first woman NBA player. After reaching a peak height of 5'5" I decided to change tacks -- using my brain seemed the wiser career choice. I'm a software engineer who craves an inclusive, culturally diverse work environment where teams work smart and play always

I want to make things, that make a difference.

EDUCATION

General Assembly

Software Engineering Program

University of Notre Dame

Bachelors of Science (Aero Engineering)

New Horizons Learning

Cybersecurity Program

WHAT I'VE DONE

General Assembly

Mar '19 - Jun '19

An accelerated web development program covering the latest frontend and backend languages and frameworks, including HTML, CSS, Javascript, jQuery, SQL, Ruby on Rails, Node.js, React, and AngularJS

Intelligence Analyst

Oct '06 - Mar '19

Leidos | Oak Grove Technologies |
BAE Systems U.S. Army

- Researched, monitored, and analyzed intelligence datasets to build network charts; made recommendations for senior stakeholders
- Liaised and communicated with the intelligence community, Korean, Afghan and Australian supporters to gather and communicate critical information
- At JIDO, requested by name (a rarity) by two high-profile teams to support analysis production
- In 2014, of a 20 person team, was one of the top 3 metrics-based producers every month; and entered more data into Palantir than any other team member, doing approximately four times the team average
- Collaborated to prepare intelligence assessments of current threats and trends based on the collection, research and analysis of classified and open source information
- 12 month deployments to Afghanistan & Iraq

WHAT PEOPLE ARE SAYING

"Atasha has been a valuable member of the Network Analysis Cell. She was able to create products that exceeded what the customer wanted. She has been by name requested to work on various assignments because of her performance and has received kudos for her products multiple times. Her knowledge and capabilities have allowed for her to support the customer in a way that she is their go to person for high level products." - 2018, Mitchell Jackson
